

Offsetting certificate

is conscious of its CO₂ emissions and by supporting certified climate projects it has offset **9.134 tCO₂e**. This corresponds to the offsetting of its **Ecogaz consumption in 2022** equal to **42680.98 MWh**.

This certificate guarantees that a monetary contribution is made to a certified climate project (**Guangdong Guanshan Wind Power Project - Verified Carbon Standard**) to support the environment and communities around the planet (further details can be found visiting the page of the supported project via the following registry link: <https://registry.verra.org/app/projectDetail/VCS/798>).

This certificate cannot, under any circumstance, be used to claim CO₂ neutrality without a full climate action plan including robust forward looking reductions measures. However, it remains a proof that **Mega Power** is taking responsibility for its climate impact.
